

catoolRT 24.6 Release Notes

Changes since 24.3:

- Ensure buttons are visible in "Configure Engine"
- Add "Sync Debug"
- Strip pathname from displayed IFile data sources
- Fix crash whilst calculating IFile group names
- Allow diagram channels of deleted data sources to be removed
- Improvements to cycle engine speed calculation with extrapolated external clock
- Fix some potential crashes
- Improve external clock engine speed and CDM diagnostics
- Prevent extrapolate external clock with high pulses per rev and lower sample rates
- Improvements to Unicode filename handling
