

catoolRT 25.12 Release Notes

Changes since 25.9:

- Add timebase resampling to "Batch Process"
- Fixes to toolbar buttons sometimes not correctly enabled/disabled
- "Configure Data" updates to icons and columns
- CSV import crash fix
- Clarified some tabbed page menus as "Make Pageless", "Delete Page" and "Rename Page"
- Fixed file import crash
- Fix missing dTa data point
- Fix some cut'n'paste issues
- Allow smaller windows based on legend size
- Correctly plot "Event" abscissa data
- Use CTRL+ESC to cancel long events that are using the status bar progress indicator, i.e. loading large files or batch processing
- Add Hi DPI toolbar icons
